

LEADING FEATURES		H401C
Scrubbing path	mm	350
Squeegee path	mm	420
Cleaning performance	m <sup>2</sup> /h	1050
Solution tank	L	15
Recovery tank	L	16
Tank Material		Polyethylene
Number / brushes size	no./mm	1/100
Max. brush pressure	gr/cm <sup>2</sup>	181
Brushes motor / power	no./ W	1/600
Vacuum capacity	mm / H <sub>2</sub> O	1700
Vacuum motor	W	900
Voltage	V	230
Weight	Kg	42
Dimensions:		
Length	mm	720
Height	mm	615
Width	mm	470
Cable length	mt.	15

# Go better with micro-scrubber

H 401C

**The smallest model of the Dulevo Scrubber-Dryers Line combines a compact size with an extremely high manoeuvrability**

## Excellent performances

For excellent cleaning performances, scrubbing and drying floors such as terracotta, ceramic stoneware, marble, linoleum, cement, PVC, clinker, ceramics, etc., the H 401 C is able to produce an operating power which is unmatched by any machine of similar dimensions. Supplied by alternate current, it has an almost unlimited autonomy. The energetic action of the cylinder brush, combined with the double adjustable squeegee unit, which collects the water and dry the floor in both backward and forward directions, allows the operator to get the best results, even in small spaces and on surfaces which are difficult to treat.

## Quick maintenance

The Recovery tank can be easily removed for cleaning purposes; the brush can also be detached and replaced without using any tool. This reduces to very little the ordinary maintenance required by the H 401 C.

## Simple to use

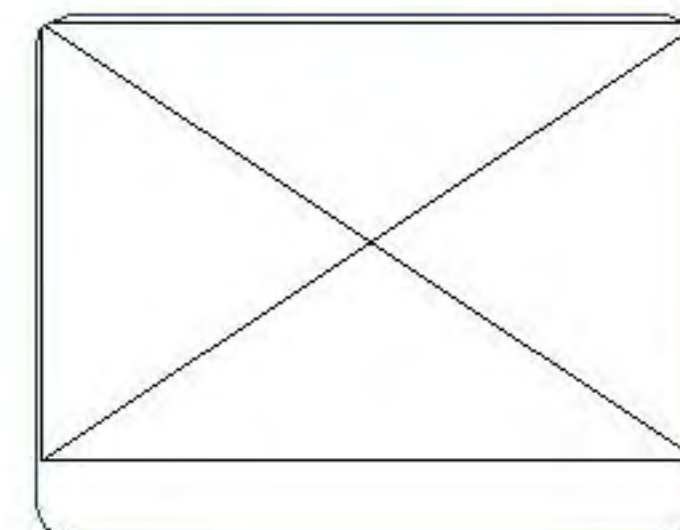

The ergonomic steering handle houses all the controls of the machine, with symbols easy to read.

For spaces difficult to reach, the machine can be equipped with a suction unit.

## Sturdy

All high quality functional components are in robust polyethylene, mounted on the steel steering handle and frame. Steel guarantees extreme sturdiness.

## Easy to transport

The H 401 C can be easily transported and stored even in a vertical position, thanks to its compact size, its weight and the possibility to fold the handle.
